

# AT&T is proud to bring you a free web seminar, “Going Mobile in K-12”: An Overview of Best Practices for K-12 Schools

**Thursday, September 11, 2008 1:00 - 2:00 PM EST**

Did you know that new mobile applications can help your school district save on fuel costs, help with student safety and can be used in classroom instruction? This web seminar will review these applications and will talk about best practices using mobile applications in the K-12 school systems.

The event will provide information to school district employees interested in new mobile applications for fleet management and cutting edge cellular technologies for instruction.

Highlighted topics include Automatic Vehicle Locator solutions, instructional applications for cellular devices and service, and an overview of contracting vehicles, such as state and master contracts and Western States Contracting Alliance addendums.

Hear from Industry Experts:

**Chris Ortiz**, Mobility Application Consultant, AT&T, Austin, TX

**Carlos Mariosa**, Product Manager for AVL-Education, AT&T, Plano, TX

**Karen Montgomery**, AT&T Education Advocate, Des Peres, MO

**Kevin Carman**, K-12 Education Marketing Manager, AT&T, Atlanta, GA

Participation in the web seminar is free.
